

6.170 Team Contract

Expected level of achievement and effort for each team member:

- Everyone is expected to chip in roughly the same amount of work
- We all agree that we would like to receive an A on this project
- We expect to divide our time evenly so as to avoid last-minute work before each deadline

Personal goals for each team member:

- Johnathon Root: I want to get more experience working on a web app in a team setting and be of maximum use to my teammates.
- Rishad Rahman: Build an application that is easy to use (intuitive UI).
- David Wu: Get more experience with web development.
- Will Wong: To get an A in the project (and in the class), to develop extensive web experience, and to experience what building a medium-to-large sized scale project is like

Frequency, length, and location of team meetings:

- We expect to meet 2-3 times a week normally (but given extraordinary circumstances, this can change); usually once right before a deadline
- If 3 times a week, Monday, Wednesday, Friday; otherwise, Tuesday and Thursday/Friday.
 - If certain circumstances prevent us from meeting as scheduled, we will simply contact each other and hold an emergency meeting
 - At least once a week, we will meet in person.
- We will meet on campus (location tbd) for our physical meetings.

How quality of work will be maintained:

- We will have peer review sessions where at least one other team member will look over the code that one member has pushed. We maintain the quality through this peer evaluation and may sometimes dedicate a weekly meeting to just peer reviewing our code. We also intend to have occasional meetings where we make sure we are on track in regards to the deadline we set for ourselves as well as the class's deadline.

How tasks will be assigned, and what to do if deadlines are missed:

- Frontend (UI): Rishad Rahman
- Frontend (logic/interaction w/ backend): Johnathon Root
- Frontend (user interaction/controller): Johnathon Root
- Backend (API): David Wu
- Backend (databases): David Wu, Will Wong
- Backend (authentication): Will Wong
- Backend (miscellaneous/controller): Rishad Rahman, David Wu

How decisions will be made and disagreements resolved:

- Everything will be decided in group meetings. Disagreements will be resolved through discussion and debate (the advantages and disadvantages of each approach). We intend to hold each member to their expectations and failure to do so will result in a discussion during a meeting.

Signatories: David Wu, Johnathon Root, William Wong, Rishad Rahman
